

5 TIPS HOW TO

CHILD- PROOF YOUR KITCHEN

CHILDREN LIKE TO EXPLORE ALL KINDS OF THINGS, THE KITCHEN IS NO EXCEPTION. FOR YOUNG, CURIOUS VISITORS, HOWEVER, THE PLACE IS ANYTHING BUT A CINCH: SHARP KNIVES OR A HOT STOVE ARE RISK FACTORS YOU SHOULD PROTECT YOUR CHILD FROM. WITH OUR TIPS YOU CAN QUICKLY MAKE YOUR KITCHEN CHILDPROOF.

#1

HEAT-FREE:

When planning the kitchen, it is a good idea to have ovens, steam cookers and microwaves installed at chest height – so that children are not able to reach the dangerous heat sources.

#2

OUT OF REACH:

Knives, alcohol, detergents: objects and food which could be dangerous for children should be stored in hanging cupboards at a sufficient height.

#3

ATTENTION, EDGE:

For the little flatmates the kitchen is especially big – so big that they can bump their heads at the corners and edges of the furniture. A suitable impact protection minimizes the risk of injury.

#4

BE SAFE:

In the kitchen you can install all kinds of child safety devices so that the little ones don't get their hands on anything dangerous. Kitchen cupboards can be locked with bolts and locks, stove and oven can be secured with protective grilles.

#5

UNDER POWER:

Electrical appliances in the kitchen should always be placed and used out of the reach of children – as well as cables that can become a tripping hazard. In the wrong hands the devices are perilous in combination with water.

We would be pleased to advise you personally in order to realize a kitchen entirely according to your ideas. At www.burger-kuechen.de/kuechenplaner we also offer you the opportunity to digitally create a personal kitchen concept for which you can use our tips directly!
